**INTERIM RESULTS ANNOUNCEMENT
FOR THE SIX MONTHS ENDED 30 SEPTEMBER 2014**

**CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”)
OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK
EXCHANGE”)**

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this announcement, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this announcement.

This announcement, for which the directors (the “Directors”) of Gold Tat Group International Limited (the “Company”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the GEM of the Stock Exchange (the “GEM Listing Rules”) for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that to the best of their knowledge and belief the information contained in this announcement is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this announcement misleading.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following disclosures of fair value measurements use a fair value hierarchy that categories into three levels the inputs to valuation techniques used to measure fair value:

Level 1 inputs: quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group can access at the measurement date.

Level 2 inputs: inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3 inputs: unobservable inputs for the asset or liability.

The Group's policy is to recognise transfers into and transfers out of any of the three levels as of the date of the event or change in circumstances that caused the transfer.

MANAGEMENT DISCUSSION AND ANALYSIS

GENERAL

For the financial year to date, the Group had been participating in the following activities:

- Mobile Application Development and Information Technology Consultant Services;
- Trading of Electronic Hardware Components (Display and Touch Panel Modules) with Compatibility Solutions Advisory Services; and
- Real Estate Development and Investment.

BUSINESS REVIEW

Mobile Application Development and Information Technology Consultant Services

The main area in the Mobile Application Development business activity is to provide mobile solution services for clients. The Group continues to engage in projects with various companies from different industries to reflect our capabilities and attempt to further develop new business operations in new geographical areas in Southeast Asia for business replications. The development and upgrade of various popular mobile platforms from developers and manufacturers such as Apple iOS, Google Android and Microsoft Windows 8 positively fuel the industry growth. Solutions for cross-platforms are also becoming a norm that increases project size on a single product. The Group has been capturing this advantage through a vertically integration on the development process.

During the current financial period, the business revenue and net loss was approximately HK\$20,728,000 and HK\$883,000 respectively. This translated to a decrease in revenue of 3.7% and resulted in a shift from profit to loss compared to the same period in previous financial year. In addition, comparing with the results for the first quarter of the current financial period, the business revenue for the second quarter was dropped by 11.3% from HK\$10,985,000 to HK\$9,743,000 while the net loss for the second quarter was increased by 1,322% from HK\$58,000 to HK\$825,000. The downturn of the operating result was mainly attributable to the increase in market competition and continuing rise in operating costs.

To increase competitiveness, a continuous focus has been made on research and development in new software on real time responses and other technologies. These developments will be put into further usages in gaming and lifestyle applications, some highly lucrative yet ambitious segments. The objective is to internally develop well known applications for the mass public market directly whilst leveraging on the extensive knowledge of the Group.

Trading of Electronic Hardware Components (Display and Touch Panel Modules) with Compatibility Solutions Advisory Services

ETC continues to prove to be a reputed unit and maintains operation under the same management team in trading of hardware electronic parts specifically relating to display and/or touch panel modules. Up to date, the business arm has maintained excellent agency service contracts of many years for the China market with two major renowned suppliers both listed on the Taiwan Stock Exchange, serving customers that are amongst the largest names in China and Asia Pacific. This further proves the mobility market and technology usability is still a strong growing industry segment. The management view is these technologies are continuing to be in high demand with an increase in applications for the foreseeable future. The Group will continue to support the business in terms of its trading capacity for a balanced growth.

During the current financial period, the business revenue and net profit was approximately HK\$667,494,000 and HK\$4,771,000 respectively. This translated to an increase in revenue and net profit of 30.3% and 41.5% respectively compared to the same period in previous financial year.

Real Estate Development and Investment

Acquired real estate development project in Yangjiang City, Guangdong Province, “Xiangjiang Peninsula” has been on schedule and progressed through stage two development steadily. The management is now closely monitoring the developments to minimize the general slow down of the China economy despite an upbeat local appetite and sentiment for the real estate.

Closer to home in Hong Kong, the Group continues to enjoy the rental returns from continued lease out of the properties.

Prospects

The constant advance in technology and changes in end-users’ tastes and preferences always remain a big challenge for MTel Limited, our arm in the mobile data solution business segment. Given entertainment, information and mobility will retain to be the largest trendsetter, MTel Limited will relentlessly research and develop to cater for all its target audiences. However, the result of this business segment for the current financial period turned from profit to loss due to the increase in market competition and continuing rise in operating costs and it is unlikely to improve significantly in the short term. Therefore, the Group will consider any proposal, including disposal of the business, which can maximise the return of the Group from this business segment.

ETC will use current relationships with suppliers and customers to look for new opportunities to increase trading product varieties and sales volume. With the existing market tread the Group is comfortable to maintain its exposure and optimistic on the general outlook of this industry segment. The Group will also optimise the expenses to increase profitability of this unit.

The unsettled economical and political changes in the PRC real estate market means the Group will continue to monitor closely on the developing projects in Guangdong province. In the meantime, with a positive local sentiment and the steady tradition of the PRC government history, the Group stays positive on the projects progress but will adjust strategies accordingly.

As always, the Group will hold a neutral stance for any further investment opportunity in maintaining growth to maximise shareholders return of the shareholders.
