(Stock Code: 8266)

**INTERIM RESULTS ANNOUNCEMENT
FOR THE SIX MONTHS ENDED 30 SEPTEMBER 2015**

**CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”)
OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK
EXCHANGE”)**

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and The Stock Exchange of Hong Kong Limited take no responsibility for the contents of this announcement, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this announcement.

This announcement, for which the directors (the “Directors”) of Gold Tat Group International Limited (the “Company”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the GEM of the Stock Exchange (the “GEM Listing Rules”) for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that to the best of their knowledge and belief the information contained in this announcement is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this announcement misleading.

BUSINESS REVIEW

Continuing Operation

Trading of Electronic Hardware Components (Display and Touch Panel Modules) with Compatibility Solutions Advisory Services

Since the start of 2015, trading of electronic hardware components has started to enter into a very difficult period, which was mainly caused by the overcapacity of suppliers and saturation of certain electronic devices on the market. This, thus, caused the selling prices of such components coming down sharply and rapidly, noticeably in the months of April to June; and even fell below the manufacturers' costs of productions. Inadvertently, such manufacturers were forced to make production adjustments accordingly so that the price decline started to become more stable in the month of August. Based on the current market situation, supply of electronic hardware components, especially display units, has started to become tense. However, this was not due to the increase in the demand on the market, but mainly on the prices being fallen sharply in the previous months caused by a reduction of supplies by numerous manufacturers.

Given the volatility of the prices in the electronic hardware components, the management team of ETC Technology Limited ("ETC") had been monitoring the overall changes in the relevant markets and together comes with the unfavourable market conditions, more attention and resources were diverted in the trading of our IC Drivers section, whereas no such volatility of the prices were experienced and, most importantly, to minimise the impact that would have caused us were we to have kept our trading of display units in the old pace. Moreover, such move would enable to minimise ETC's exposure and reliance on such fierce and volatile market of the display units and to strengthen our position in the IC Drivers.

Management of ETC expects that, in the next six months, revenue from the trading of the display units will increase. This was mainly attributable to that the price decline was too deep and too rapid, and now that the prices have become relatively stable plus the noticeable increase in customers' willingness to place orders. Nonetheless, with the advances in technology, thin-film display units have started to become commercialised in recent months. Whereas almost all manufacturers of display units are still adjusting and upgrading their production scope and productions, and with other new manufacturers entering into the market, competitions will surely be fierce. The management of ETC will continue to closely monitor the changes in such market, notwithstanding the changes and enhancement of our electronic hardware components being traded; so that a better product-mix, better margins and a more stable selling prices for trading of our products can be achieved.

Real Estate Development and Investment

The Group has a real estate development portfolio of three and displayed the concentration effort in the area of Yangjiang City. The most notable project is Xiangjiang Peninsula, with stage two constructions underway and near its completion phase whereas the Group had also already begun the pre-sale of stage two. However, the progress of the pre-sale of stage two was slow and fell behind the management's expectation. In regard of this, the Group will keep a close eye on the progress of pre-sales activities of Xiangjiang Peninsula and whether if any extra promotional and/or marketing activities were needed.

It was noted that despite a general downturn of the Chinese economy, the local appetite and sentiment for the real estate had maintained because of the general public's housing needs; however the sentiment remained conservative. The Group will continue with its cautious investment evaluation approach and along with more preparations aiming against possible adverse conditions.

Discontinuing Operations

Mobile data solution business

The Group discontinued its mobile application development and information technology consultant services business by entering into a sale and purchase agreement to dispose to a director of certain subsidiaries of the Company for a consideration of HK\$8,560,000. The disposal was completed on 19 December 2014.

Prospects

Chinese real estate market in the past year is entering a period of adjustment, the growth rate of real estate investment decreased significantly. However, with a steady, positive and healthy development goal as enchanted and being implemented by the Central Government, long-term mechanism is being established to improve and enhance the state of the real estate market in China. Coupled with the control and reform policies such as the withdrawal of restricted measures imposed on loan to end users and purchase of properties, lowering of the Require Rate of Reserves and interest rates, the real estate market in first half of 2015 and especially in the third quarter of 2015 has noticeably picked up. The transaction volume also increased moderately. With the next stage of reforms for the Chinese economy, a prudent monetary policy and proactive fiscal policy are to be expected so as to stimulate the real estate adjustment and make it be more market-oriented, and thus conducive to the medium and long term development and enhancement of the real estate market in China. The Group will continue to closely monitor the development of our projects in the Guangdong Province, and will actively review our development strategies so to capture new market opportunities.

Moving forward, the Group will continue to explore new investment opportunities, with a view to enhance the profitability of the Group as well the return and growth of the shareholders.

FINANCIAL REVIEW

Revenue and Results

For the six months ended 30 September 2015, the Group recorded an unaudited turnover of approximately HK\$320,187,000 (2014: approximately HK\$671,539,000 (restated)), representing a decrease of 52.3% as compared to the corresponding period of last year. The revenue was mainly contributed by the trading of electronic parts and components business.

The Group recorded a loss for the six months ended 30 September 2015 of approximately HK\$16,835,000 (2014: approximately HK\$8,761,000), representing an increase of 92.2% as compared with the corresponding period of last year.

The decrease in unaudited turnover and increase in unaudited net loss for the six months ended 30 September 2015 as compared with that for the corresponding period in 2014 was mainly due to the decrease in both the Group's trading volume and selling prices of electronic parts and components in relation to display modules and touch panel modules in the six months ended 30 September 2015 as compared to the corresponding period in 2014. The decrease in trading volume and selling prices was mainly attributable to a downturn in mobile phones and tablet market which in turn resulted in decrease in demand for LCD panels; and manufacturers' continuously price-cutting competition.

Loss attributable to owners of the Company for the six months ended 30 September 2015 was approximately HK\$17,152,000, representing an increase of 57.9% as compared with approximately HK\$10,866,000 for the corresponding period in 2014.

HK and US dollar denominated borrowings accounted for 61.4% (31 March 2015: 50.3%) and 38.6% (31 March 2015: 49.7%) of the total borrowings respectively.

48.5% (31 March 2015: 57.4%) of borrowings are interest bearing bank loans on floating rate terms, the effective annual interest rates range from 2.25% to 2.50%, 22.7% (31 March 2015: 18.1%) are seven-year 5% coupon straight bonds due 2020; 26.3% (31 March 2015: 20.8%) are 4% convertible bonds due 2015; 2.2% (31 March 2015: 3.4%) of borrowings are interest bearing other loans on fixed rate terms and the remaining 0.3% (31 March 2015: 0.3%) are interest bearing finance lease obligations at fixed interest rates.

At 30 September 2015, the Group had cash reserves of approximately HK\$75,075,000 (31 March 2015: approximately HK\$58,470,000). Most of the cash reserves were placed with major banks in Hong Kong and the PRC. 96.5% (31 March 2015: 93.7%) of the Group's cash and cash equivalents (comprising cash on hand and bank balances) were denominated in HK dollar or US dollar, whereas 3.5% (31 March 2015: 6.2%) were denominated in Renminbi.

The gearing ratio as at 30 September 2015 was 62.2% (31 March 2015: 85.1%). The gearing ratio was derived by dividing the total borrowings including the bank and other loans, bonds, convertible bonds and finance lease payables of approximately HK\$176,196,000 (31 March 2015: approximately HK\$220,727,000) by the amount of shareholders' equity of approximately HK\$283,102,000 (31 March 2015: approximately HK\$259,258,000). The liquidity ratio of the Group, represented by a ratio between current assets over current liabilities, was 131.8% (31 March 2015: 117.5%).

The management of the Company will continue to make good efforts to improve the liquidity condition. Measures will include but not limited to tightening of costs control, expansion of current businesses, the securing of additional loan facilities and/or raising funds from the capital market.
